## Self-Assessment:

To build up a career in a well-established and environment-friendly organization where acquired knowledge and expertise can be used effectively and efficiently.

I know enough of HTML, CSS, Bootstrap, Javascript, React, Node.js, MongoDB, and Express.js. I'm not a master of any, but know how to use Google for help.

## Programming Skill:

**Comfortable:** HTML, CSS, Bootstrap, JavaScript, React, Node.js, MongoDB, Material-UI, ES6, Heroku, Firebase, Netlify, Swiper.js

**Familiar:** React Native, React Hook Form, Mongoose, Redux, Sass.

## Recent Project:

Name:  **Repair Master** [In April 2021]

- ☐ Live link: [Repair Master](#)
- ☐ Github link: [Client](#) || [Server](#)
- ☐ Using Tools: **React, React-Router, Node, MongoDB, Express, Firebase, Bootstrap, and other essential elements.**
- ☐ On this site I use two main parts, one is Admin Dashboard and the other is Customer Dashboard. On the home page service and the review will show dynamically.
- ☐ In the Customer Dashboard, a customer can see his/her ordered service, total order, the current status of that order and can give review the service.
- ☐ In Admin Dashboard Admin can add Admin, add Service, delete service changing orders service status, and see brief information of this site.

Name:  **Fresh Supermarket** [In April 2021]

- ☐ Live link: [Fresh Supermarket](#)
- ☐ Github Link: [Client](#) || [Server](#)
- ☐ Using Tools: **Firebase authentication, React, React-Router, MongoDB, Express Node.js, Bootstrap, and other essential elements.**
- ☐ On this site, anyone who has an account or login access can add a product, delete the product, order the product and can see his/her ordered total product list.
- ☐ All add products will show dynamically on the home page.

**Name:** 🏇 **Fast-Rider** [In March 2021]

- ☐ Live link: [Fast-Rider](#)
- ☐ Github link: [Client](#)
- ☐ Using Tools: **React, React-Router, Firebase authentication, Private route, Bootstrap, and other essential elements.**
- ☐ On this site, customers can choose one option to ride somewhere after login by creating a new account or sign in with Google and Facebook.
- ☐ On this site, showing google Maps by the iframe.

**Name:** ⚽ **Fantasy Football League** [In Feb 2021]

- ☐ Live link: [Fantasy Football League](#)
- ☐ Github link: [Client](#)
- ☐ Using Tools: **React, React-Router, Bootstrap, API, and other essential elements.**
- ☐ Here I use theSportsDB Api for showing data.
- ☐ Anyone can see specific club information by clicking on the explore button.

### **Academic Qualification:**
